

Announcement 1: Melbourne Datathon 2017

- 13 April - May 5 (3 weeks)
 - 2 competitions
 - Insights
 - Kaggle
 - New dataset
-
- Free event, free pizza, free drinks
 - Cash prizes (\$5k)

<http://www.datasciencemelbourne.com/datathon/>

Announcement 2: Melbourne Data Science Week 2017

- 29 May - 2 June
- Tutorials
- Networking
- Conference (\$70 for students)

From ambiguity to clarity.

Solve for x

Solve for A and B and don't forget about C. Build platform D to inform E about F. Show G in terms of H and I and sort by J. Follow rule K to inform L about change in M, correlating N with O while accounting for P. Study Q, forget about R. Test S compared to the T. Change U because exploring V said W. Definitely assume X. Extract Y.

Solve for A and B and don't forget about C. Build platform D to inform E about F. Show G in terms of H and I and sort by J. Follow rule K to inform L about change in M, correlating N with O while accounting for P. Study Q, forget about R. Test S compared to the T. Change U because exploring V said W. Definitely assume X. Extract Y from the trends in Z. Perhaps?

Communicating
complexity

Communicating complexity

As a student, your audience is smarter than you.

As a data scientist, you are the educator.

Communicating complexity

Communicating complexity

Real data

XYZ

User interfaces

- Human complexity in the input data
- Human complexity in processing the data
- Human complexity in showing the data

Actionable insights

Actionable insights

“It is easy to get caught up in paralysis by analysis, where we go down these rabbit holes of interesting factoids that can never be translated into action”

- Andrew Means

Over-engineering

Over-engineering

The deep dive

- Phrase modeling
- Latent Dirichlet Topic Modeling
- Word vector models with Word2Vec
- Visualising Word2Vec with t-SNE

Great tutorial: [Modern NLP in Python](#)

Over-engineering

The deep dive

- Phrase modeling
- Latent Dirichlet Topic Modeling
- Word vector models with Word2Vec
- Visualising Word2Vec with t-SNE

The shallow dive

- Word frequencies
- n-Grams
- Wordclouds
- Reading the text itself...

Great tutorial: [Modern NLP in Python](#)

- [KD Nuggets](#)
- [Roundup](#)
- [O'Reilly](#)

Take-homes

Portfolio

1. Learn Git
2. Fork a template ([fork my website](#))
3. Put your stuff up

Be smart about the projects you get involved in.

Take-homes

Portfolio

1. Learn Git
2. For someone else's website
3. Put your stuff up

Be smart about the projects you get involved in.

Getting a job

1. Network, Meetup, Datathon
2. And/or let your work speak for you

Take-homes

“The confusing messages about the data science career”

- [u/sasquatch007 on r/datascience](#)

For the things we have to learn
before we can do them, we learn
by doing them.

- Aristotle
